

# 2009-10 Employment Graduates 2009-2010 Status

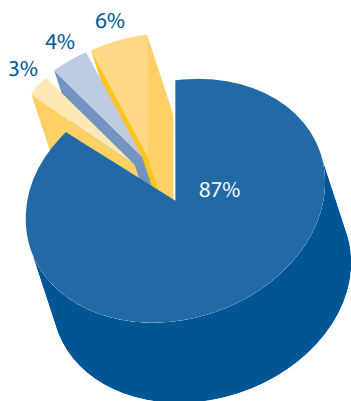

Career Services Center, Old Main 280

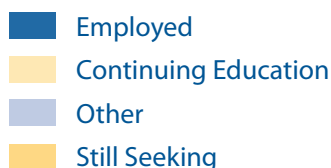

Bachelor's Degree Graduates

Master's Degree Graduates

Teacher Certificate Recipients

The Career Services Center of Western Washington University surveyed 2009-2010 bachelor's and master's degree recipients, as well as those who received teacher certification. Graduates responded to our web-based survey three to six months after graduation. Those who did not respond received a survey by mail six months after graduation. Telephone calls were made to the remaining non-respondents. Employment data was also supplied by the University's academic departments.

As a result of all these efforts, data were collected from 54% of the 2,993 students who received

bachelor's degrees; 84% of the 308 students who received teacher certification; and 77% of the 325 students who completed master's degrees in 2009-10. The sample represents a margin of error of + 1.4%. The survey results are summarized in this report. Additional information can be found on the Career Services Center website ([www.careers.wvu.edu](http://www.careers.wvu.edu)) and in Old Main 280. Questions regarding these data should be addressed to Tina Loudon, Director, or Aaron Ignac, Assistant Director of Operations, at (360) 650-3240.

## Highlights Employment

The results of our 2009-2010 survey strongly align with the evolving and marginally improving job market and economic recession. Bachelor's degree recipients experienced a slightly more positive job market, with 72% reporting employment compared to 69% last year. The percentage of those reporting employment in field-related positions (44%) also represents an improvement over last year (40%). For bachelor degree recipients, the average starting salary was \$34,068 which is comparable to last year's results. Graduates with a major in Journalism (up 20% to \$25,089), Management (up 10% to \$37,942), and Communication (up 8% to \$34,110) reported some of the largest increases in their starting salaries compared to last year.

Employment for teachers remained exactly at last year's level of 87%, with the percentage of substitute teaching decreasing slightly to 33% from last year's 36%. The employment rate for master's degree recipients was 78%. This represents a decline from last year's 84%, though the percent of master's degree recipients employed in their related field (68%) remained consistent.

The value of internship experience was again supported by this year's results. Graduates with internship experience continued to find their jobs faster, were more likely to be in a field-related job, and reported higher starting salaries.

## Continuing Education

Typically, when the job market tightens, the percentage of bachelors' degree candidates continuing their education goes up. For 2009-2010, the rate was 14.3%, only slightly lower than last year's 15.1%. Undergraduates continuing their education was highest in Physics (67%), Chemistry (53%), Communication Science & Disorders (44%), Mathematics (29%), and Economics (26%). Western grads continue to

be competitive in gaining admission to a broad range of programs at schools across the country and beyond: Duke University (Psychology), Cornell University (Chemistry), Georgetown University (Law), University of British Columbia (Political Science), University College London (Linguistics), and Vanderbilt University (Audiology).
