

PRIVATE TUTOR REFERRAL LIST

The Private Tutor Referral List offers an additional resource for students seeking tutorial assistance. Students may want to work with a private tutor to gain flexibility in scheduling meeting times and locations, to ensure that the student works with the same tutor at each meeting, or to work on subjects not normally available through other University resources.

The Tutorial and Academic Skills Center provides the list as a referral service only. The tutors listed on this sheet are not necessarily affiliated with the Tutoring Center or Math Department. We do not endorse any particular person on this list. Students should contact the people on this list directly to determine academic expertise and tutoring fees.

It is certainly fair to ask prospective tutors for a copy of their college transcripts, for references from students they have tutored in the past, and for references from professors familiar with their academic work.
