

Glossary of Degree Evaluation Terms:

Adjustment	An adjustment reflects changes, such as waivers or substitutions, applied to your academic program.
Area:	An area represents a subset of requirements within a program (e.g. major, electives, GUR).
Attribute:	An attribute identifies specific characteristics of courses and students that can be used in degree evaluation (HUM and SSC are examples of GUR course attributes).
Catalog Term:	Appears on the degree evaluation. Reflects the year of the catalog in which a student bases the requirements of the program and is the same as "Entry Term".
Curriculum:	The programs offered at Western Washington University are what constitute the curriculum. These include such basics as level, degree, major, and minor.
Entry Term:	The catalog term requirements will be evaluated against. For undergraduate students, "Entry Term" is the term of major declaration. For graduate students, "Entry Term" is the term of matriculation.
Evaluation Term:	Anticipated term of graduation.
Expected Graduation Date	At WWU, the date does not necessarily reflect the actual Expected Date of Graduation and should be ignored. The Expected Graduation Date is set a number of years beyond the current quarter so that loan companies do not put students in repayment status.
In Progress:	Courses a student has registered for that have not yet been graded and entered into academic history. Will be shown with a source code 'R' on the evaluation. Degree Evaluation assumes satisfactory completion of the registered courses, and that none of these is a repeat or exceeds the maximum allowed toward degree requirements.
Met:	Indicates requirements for a program or area have been satisfied.
Not Met:	Indicates requirements for a program or area have not been satisfied. If a student has transfer work that has not been equated to WWU courses, Credit Evaluators in the Registrar's Office or department advisor will need to determine if the area has been met.
Overall GPA:	Cumulative grade point average for all courses taken at WWU.
Program:	The goal (e.g. degree or GURs) that a student aims for.
Program GPA:	Is not used at WWU.
Requirements:	The detailed specifics of what the program or area require. Requirements can be things such as the specific grades allowed, maximum number of courses, and minimum GPA. The General University Requirements, major, and other university requirements are broken down into area requirements. Each area requirement is independent and must be satisfactorily completed. The requirements are not completely satisfied if any area requirement is deficient and is marked "Not Met".
Result as of:	The date the degree evaluation report was run.
Rule:	A rule is used to handle complicated requirements (e.g. Select 3 courses from a list of 10 courses).
Source	Indicates how the requirement was met. H =History (WWU graded); T =Transfer equivalent; R =Registration (WWU in-progress courses); E =Exam/Test Score; Z =Student attribute; P =Adjustment (substitution/waiver)
Used:	Indicates the number of credits/courses used for the degree evaluation. Includes in progress courses.
Unused:	Indicates the number of credits/courses not used for the degree evaluation. Generally contains courses with grades of F, X, U, K, NP, TX, and W.
