DRINKING WATER REPORT FOR LEAD

<table>
<thead>
<tr>
<th>Date Collected: See below</th>
<th>System Group Type: A</th>
<th>B</th>
<th>Private</th>
</tr>
</thead>
</table>

**Water System ID #: NA**

**System Name:** Western Washington University

**Lab/Sample #: See below**

**Source Number(s):** S93

**Sample Location:** See below

**Date Received:** 12/04/08

**Sample Purpose:** Investigative

**Date Analyzed:** 12/08/08

**Sample Composition Distribution**

**Date Reported:** 12/09/08

**Supervisor:**

Mark Lorenz

**Sample Type:** Post-treatment

**Sample Collected by:** John K-S

**Phone Number:** (360) 650-7612

**Send Report To:**

Western Washington University

516 High Street

Environ. Studies 72 MS9070

Bellingham, WA 98225

**Bill To:**

### NOTES:

- Trigger: 0.015 mg/L for Lead and 1.3 mg/L for Copper. If compounds detected at concentration are in excess of this level, contact your regional DOH office for further information.
- SRL (State Reporting Levels): Indicates the minimum reporting level required by the Washington DOH.
- MCL (Maximum Contaminant Level): If the contaminant amount exceeds the MCL, immediately contact your regional DOH office.
- * This symbol before a number means the compound was not detected in the sample; also, the laboratory used a Method Detection Level (lab MDL) lower than the SRL.

### COMMENTS:

PH-2 & PH-1 samples were taken after 30 second flush.
