Division Mission Statement

The Division of Enrollment and Student Services engages and challenges students in their pursuit of academic and personal excellence through outreach, support services, and co-curricular learning opportunities.

Enrollment and Student Services is responsible for nearly all of our students’ out-of-the-classroom experiences — from application to commencement, and at every point in between, we support the healthy development of all our students, in every aspect of their Western experience.

There are almost 16,000 Western students. 95% of them are undergraduates, and 87% of them are Washington residents. 57% of our students are women. 25.6% of our students identify as students of color. The average age of our first-year students is 18; average age of students overall is 21. 92% of last year’s first-year students lived in one of our 9 residence halls, and 62% of them already had some college credit when they came to campus. 70% of our students graduate within 6 years of enrolling.

Vice President Melynda Huskey leads the Division of Enrollment and Student Services. Functional teams in the area include:

- **Enrollment Management** (Associate Vice President position open)
