Campus Recreation Services

Based on last year’s increase of $75,000 to the Sport Club allocation, Campus Recreation Services has been able to sustain and support 50% of the 24 clubs’ expenses. In conversations with the S&A Committee last year, it became a goal of both the committee and the department to reach a level of support for the Sport Clubs. Considering that this condition has been met, Sport Clubs is not asking for an increase for academic year 2015-16. Intramural Sports, which includes the expenses of professional and student salaries and benefits, will also not be asking for an increase. Under the leadership of a new Director, Campus Recreation Services will be reorganizing the department in an effort to become more efficient and streamlined. The appointment of the Associate Director to the Director position will allow the department to recapture salary savings and thus offset costs of classified salary step increases, minimum wage increases, and 3% professional staff salary increases.
