$\qquad$
In this assignment you are asked to study two famous mathematical objects the Koch snowflake and the Sierpinski carpet. Since these are famous objects there is a lot of information about them on the internet. So, the answers to the questions that are asked here are probably available. But, please present your own work here. What we learned about series and series should be sufficient to answer these questions.

Problem 1. The Koch snowflake is a figure that is constructed in the following way: The Koch snowflake at step 0 , denoted by $K_{0}$, is an equilateral triangle with sides of length 1 . Then, on each step we break every side of the figure into three equal segments, on every middle segment we build an equilateral triangle (facing outwards from our figure) and finally we throw the middle segments away. The Koch snowflakes $K_{0}, K_{1}, K_{2}, K_{3}, K_{4}, K_{5}$ are given in the figures below.
(a) Calculate the length $L_{n}$ of the Koch snowflake $K_{n}$. What is the limit of $L_{n}$ as $n \rightarrow+\infty$ ?
(b) Calculate the area $A_{n}$ enclosed by the Koch snowflake $K_{n}$. What is the limit of $A_{n}$ as $n \rightarrow+\infty$ ?

Problem 2. The Sierpinski carpet is a figure that is constructed in the following way: The Sierpinski carpet at step 0 , denoted by $S_{0}$, is a unit square. At step 1 the square is cut into 9 congruent subsquares in a 3 -by- 3 grid, and the central subsquare is removed. The remaining 8 subsquares form the figure is $S_{1}$. The same procedure is then applied recursively to each of the 8 subsquares to obtain $S_{2}$. Continuing this procedure recursively we obtain $S_{n}$ for each $n \in \mathbb{N}$. The Sierpinski carpets $S_{0}, S_{1}, S_{2}, S_{3}, S_{4}, S_{5}$ are given in the figures below.
(a) Calculate the area $A_{n}$ of the Sierpinski carpet $S_{n}$. What is the limit of $A_{n}$ as $n \rightarrow+\infty$ ?
(b) Are there points that are in all Sierpinski carpets $S_{n}$ ? That is, are there points $P$ such that $P \in S_{n}$ for all $n \in \mathbb{N}$ ? Identify some of these points.
