Division of Enrollment and Student Services
Assessment Cycle

Identify intended outcome (program or learning)

Identify methods to achieve outcome and measure results

Implement methods and measurements

Summarize and analyze the results

Use results to inform future strategies and resource allocation

What effects or changes will you see as a result of this program or learning outcome?

What type of assessment is this? How will you best measure it? What assessment methods will be utilized?

What is the timeline for implementation? Who will be responsible for it?

What are the results and what do they tell you? What can you learn from them?

What changes will you make based on the findings? How will these changes impact resource allocation?
